Millennium Electric Ltd.

Millennium is an Israeli based company with vast experience in the international solar energy industry. The company has representatives throughout the world. Millennium has a production capacity of 207 Mega Watts per year, and specializes in the production and installation of solar power stations and photovoltaic (PV) solar systems. Millennium has developed a unique, patented technology: PVT (MSS and MSS Co-Generation), that enables maximum efficiency of solar energy production and as a result, a return on investment and economic profitability. Millennium Electric panels have TUV 61215 certificate and are already installed in power stations in Italy, Spain, South Korea, Germany etc.
